

Theme: Shanghai library FOLIO project

Time: February 15, 2022 07:00pm (EST) / February 16, 2022 08:00am (GMT+8)

Attendees:

Vincent Bureau (Enterprise Architect, EBSCO)

Gang Zhou (Project manager, Shanghai library)

Sha Jiang (Technical Director, Jiata)

Lucy Liu (Product Owner, Folio China)

Notes:

1. Documents are needed to help understand how to operate folio. (Gang Zhou)

- Some useful sources:
<https://dev.folio.org/reference/>
<https://github.com/folio-org>
<https://docs.folio.org/docs/>
<https://wiki.folio.org/display/FOLIOTips/Information+and+User+Guides+for+FO+LIO+Apps>
- Where to ask questions:
Slack (Everyone can join Slack and ask questions.)
<https://discuss.folio.org/>

2. UXPROD-3515: Concurrent Check-outs via Self-check do not check for patron item limits was reported by SHL and was not prioritized in the community. However, a proposed solution has been designed. Is the Benevolence team willing to implement the design and give it back to the community? An EPAM solution architect can help review the code to make sure it's acceptable by folio. (Vince)

The Team will discuss it and get back to Vince when a decision is made.

3. The implementation of the Spring Way framework in folio (Sha Jiang)

Vince:

- All new development work should use the Spring Way framework.
- There are some apps developed with Spring Way, for example, mod-search, Export Manager, data import, etc.
- All the recent work done by the EPAM team is done with Spring Way.

Lucy's notes:

- **Owen Stephens:** "Not all modules are developed in the same way, and although Spring Way is a Tech Council recommendation for new modules (<https://wiki.folio.org/display/TC/2020-11-04+-+Technical+Council+-+FOLIO+Wiki>) there's no obligation to use Spring Way (this is not a condition of

acceptance of modules) and there are many modules still developed using RMB/RAML as well as ones that use completely different approaches (including Agreements, Licenses and the upcoming OA Publication Request management app which I'm PO for)" - From chat in the PO channel, February 16, 2022 (EST)

- Where to find the complete list of modules/apps developed with Spring Way:
<https://wiki.folio.org/display/REL/Team+vs+module+responsibility+matrix>

4. SHL and China's folio community will host the WOLFcon Asia Pacific Conference in April. Will Vince be interested in attending it and doing a presentation? (Lucy)

Vince: Will consider it. Want to see the agenda first.
