Goals for 2024

Training

- Training/information on customizing LDP/Metadb for your own institution, such as integrating your own repository in the data warehouse, integrating your own tables, integrating other data sources, etc.
- Build a series of introductory training videos focused on learning the FOLIO data model in different functional areas and how FOLIO data can be queried in LDP1/Metadb (Build Training Program for FOLIO Data Model)
- Transitioning from LDP to Metadb - keep training, and important for institutions to move to Metadb in January 2024
- More Metadb Training - implementing, using, etc.
- Develop Reporting App training

Development

- Review completeness of porting all LDP1 derived tables to versions that work for Metadb (Port LDP1 derived tables to Metadb)
- Add comments to metadb tables
- Build a directory of extracted and derived tables
- Continue to build query cookbook-style documentation in the FOLIO Analytics wiki
- Form Subteam to Explore Data Integrity Verification

Community

- Ask institutions to share their experiences implementing different kinds of reporting solutions
- Discuss use of Reporting App
- Encourage community feedback on use of various reporting solutions, e.g., LDP, LDPLite, Metadb, Reporting App, Knime, BI, CloudBeaver, Lists, etc.
- Establish a regular schedule of recruitment for new SIG members (Recruit from new institutions not represented)
- Establish a quarterly schedule of outreach for reporting activities (e.g., FOLIO Forum presentations, WOLFcon presentations, direct communication with community members and institutions)
  - maybe each development group can go to SIGs and give update/presentation on Metadb, LDP Reporting App, LDLite, query repositories (maybe a few times a year)
- Define what we are doing - what is in scope, what is out of scope; build a shared understanding of what the Reporting SIG goals are and communicate that clearly
  - Could have subgroups come up with mission statements, share those with the Reporting SIG
  - Could arrange a conversation in SIG meetings to hear everyone's thoughts on participation, roles, etc.
