# UI issues discussion

This is a cleaned-up version of the sheet I put together the week of 4/3/19, for discussion of priority and disposition. Instead of priority and "Make a JIRA?" fields, I've included action items and summations of our discussion.

Issue description	Disposition	Notes
"Preferred contact" field is mandatory in the UI, but not in the JSON.	Bug. Make a JIRA ticket.	It looks like a data integrity error. It would be nice to have a JSON schema for migration.
"Preferred contact" field will only accept e-mail addresses, regardless of contact type. The type of value should match the type of contact (i.e., text message should accept a mobile number, e-mail should accept e-mail address, etc.	Bug. Make a JIRA ticket.	For these two issues, I've made a JIRA ticket. Please feel free to add to it if you have something you want to contribute to it. ◼ **MODUSERS-117** - "Preferred contact" field requires e-mail address OPEN
Last session screen is remembered. even if a new person logs in.	Either bring up on development slack channel, or create a user story	It was agreed that this was not a good outcome, but we don't know if it was ever brought up as a requirement before.
Auto-complete function in the Users app remembers words/terms from previous sessions. Perhaps we shouldn't have auto-complete in Users app?	Either bring up on development slack channel, or create a user story	As above, it was agreed that this was not a good outcome, but we don't know if it was ever brought up as a requirement before.
A person who is permitted to edit a user profile is capable of changing an existing username. Username should be immutable for most of the staff.	User Story	This would, we think, require creating a new permission to lock down the editing of the username while allowing users to edit other parts of the user profile.
Usernames are case-insensitive for logins.	Not a priority for those who were present.	Maura will send out an e-mail to the UM-SIG list to make sure we haven't missed the input of anyone who might see this as high-priority.
