Discussion items

Item	Who	Notes
MARCcat UX/UI analysis	Filip Jakobsen, David García Sánchez, Annalisa Di Sabato	Continue the discussion on the points listed in the document saved in: https://docs.google.com/document/d/167ar6mT-wwaTdrt_-6Ud3Z5npkZ4VFv-icyxCGV_2iQ/edit.
		Presentation of more UX work done by Filip and David, considering the suggestions of the subgroup coming from the last meeting.
		Recap from last meeting:
		UI updated with real data
		Authority records + bib records in results
		Associated bib records display below when viewing authority record in right-hand pane
		What/how much info do we want displaying in the column headers in the collapsed view cards?
		Spreadsheet where we should input / make comments about the column headers we want:
		https://wiki.folio.org/download/attachments/14456804/WeCat_Bibliographic_Indexes.xlsx?api=v2
		Two big topics still be addressed: local authorities & local tag tables need to discuss these when someone who uses local authorities is present
		------------------
		Looked at desired behavior (as best we can guess) for screen readers in the variable length fields
		Considered a filter or "jump to" option at top – preferred the "jump to" command, with the focus moving for screen readers while for sighted readers the cursor would move and the non-selected fields would be "grayed out"
		We are assuming that it would preferable for the screen reader to read an entire field by default, including the MARC tag, indicators, subfields, and punctuation.
		TAB would jump to the next subfield
		We do want a drop-down option to look up MARC tags while entering, but don't want the screen reader to read the tag label each time.
		That is, it should say "245 0 0" not "245 Title proper 0 0"
