About us
The Community Outreach SIG aims to keep the community informed of news and events and encourage community engagement in the project. The SIG maintains communication channels, including FOLIO.org, Twitter, a community newsletter, the blog and the public calendar and will explore and make recommendations to adopt new channels to enhance communication to the community. The SIG maintains a conference calendar and helps facilitate coordination and submission of topics. The SIG provides shared materials for use by the community, including logos, a branding guide, slide template, a template on how to host a meetup, etc. The SIG will continue to look for ways to enhance communication and engagement in the project.

Communication Channels
