

Settings - Tenant

Purpose

This section provides configuration options for the tenant as a whole, including options for system configuration, language support, single sign-on, and location information.

Permissions

Permissions for this section (as of Edelweiss) include:

- Settings (tenant): Can create, edit and remove service points
- Settings (tenant): Can create, edit and remove locations
- Settings (tenant): Can edit language, localization, and currency
- Settings (tenant): Can maintain key bindings
- Settings (tenant): Can maintain preferred plugins
- Settings (tenant): Can maintain SSO settings
- Settings (tenant): Can manage tenant addresses

UX/UI

This area provides access for the following settings - follow links to get information about specific areas.

General

[Addresses](#)

Key Bindings - as of 11/1/2019 this is deprecated and planned for removal. See

 [UITEN-65](#) - remove key bindings from tenant settings [OPEN](#) for updates.

[Language and localization](#)

Preferred plugins

SSO Settings

[Service points](#)

Location Setup

[Institutions](#)

[Campuses](#)

[Libraries](#)

[Locations](#)

Searching

There is no default search function available in this area of settings.

Functional Processes

There are functional processes associated with each of the areas of access, but not with this area of Settings directly.

Reporting

There is no default reporting for this section of Settings - this is more about organizing the individual areas of settings, so there may be reporting in those areas that are organized here.

Integrations
