RA - Reserves September 10, 2019

Date

10 Sep 2019

10:00 Eastern @https://zoom.us/j/580817848

Attendees:

Kelly Drake

Jarmo Schrader

New England Conservatory Library

Erin Nettifee

Wendy Wilcox

Andrea Loigman

Elizabeth Chenette

Patrick Sanders

Discussion items

Time	Item	Who	Notes
1min	Development plan, timeline and Sub-group goals	Kelly Drake	Sept 10 - Active Course Status and Interoperability Sept 17 - Moodle demo of Course Reserves Sept 17 - Reporting Sept 17 - LTI with Duke re: Course Reserves Sept 24 - Fast Add
	Reporting homework - Course Data Reports		Item reports vs Course info reports - What reports are course data only vs circulation or item only reports - Reports that are item + course data - Kelly Drake to add a list of fields that are course app only

| | Unresolved issues | | Copyright

- In the Copyright tracking sections we really need to come up with better text for this:
    - Different sections of this item used in this book [check box]
    - Additional sections of this item used in this course check box
    - Need to track additional portions of this items are used in this course
    - This is in Ares but the copyright functionality might not be used.
    - Kelly Drake to ask developers if we can tie enrollment to the a course (lti?) even though this is way beyond the current scope of the project.
- "Payment based on" Wendy Wilcox can weigh in on Ares use. : could be a controlled vocabulary
    - payment usually based on CCC and enrollment in course, but it could by the number of people who actually access the file.
    - Decided that this will be a notes field

Active Course Status

- Select box function for "Active" and "Inactive" or Publish? (separate from date)
    - but how to set on an ongoing bases?
- or could the user just not add a Term?

New Issue Discovered!

Faculty sometimes want a 'custom' title.

There is no mechanism to link an item that is part of another item. Ex: chapter of one book is not linked to the book. This can be used for citation information.

- But this does not seem to be an issue at most libraries
- Duke and Amherst need all the bibliographic info (Chapter and title, etc) to display
    - Could be part of fast add (forms part off) |
| | Interoperability - Discovery layer | | VuFind

EDS

Blacklight. EX: http://blacklight.flo.org/

All of the following options are also determined by the Discovery layer but...

What fields/data should be viewable?

- Course name, number, section, instructor, etc

What fields should be discoverable?

What fields/data should not be exposed?

- copyright? |
