Status	Definition
<b>Open</b>	Feature is waiting to be picked up by PO.
<b>Draft</b>	Feature is being worked on by the PO. Discussions are happening with the SIGs and sub-groups, mock-ups are being created. Analysis is underway.
<b>Analyses Complete</b>	PO analysis is complete. Stories are written and mockups have been created.
<b>In Progress</b>	Analysis is complete and development is underway. While it is often the case that we begin development on some aspects of a feature before the PO's analysis work has been completed, <i>please do not move a feature into Development (In Progress) until after Analysis is Complete</i> . This is important so we can maintain visibility into what features that have remaining PO work.
<b>In Review</b>	Most or all stories in the feature are In Review (being tested).
<b>Closed</b>	All stories in the feature have passed test and are closed. Feature is complete.
