Notes

- Brooks shared a link: INN-Reach to a document describing INN-Reach architecture.
- Pub/Sub is the mechanism that FOLIO is planning to use for the sort of messaging functionality that INN-Reach needs, but it is low priority for FOLIO.
- We have to decide if we want to wait for Pub/Sub and push for it to be completed faster or implement Kafka faster and maybe have to change again later when Pub/Sub is ready.
- Pub/Sub may be a year before it is ready to be used.
- Consensus is to go with Kafka quickly even if it duplicates effort with Pub/Sub.
- Discuss Visiting Patron functionality and Pick Up Anywhere functionality.
- Brooks will let us know of the slack channel if there is anything other’s can do to help the project.
