

Round III - MVP

Libraries that require all MVP feature for go-live. (No more, no less)

All functionality that exists in Round II.

Please see this [JIRA search](#) for more MVP details.

Round III - MVP Libraries

Wentworth (FLO)

GBV libraries

Improved Search

- Normalized call number search and sort

-  [UXPROD-1655](#) - Inventory. Search call number (Core functional) - thin thread
CLOSED
-  [UXPROD-2264](#) - Inventory. Search call number, normalized (Core functional)
CLOSED
-  [UXPROD-2002](#) - Implement Normalized Call Number for Sorting (LoC Parsing Only)
ANALYSIS COMPLETE

Metadata Management

- Exports
 - Advanced export is not MVP, EDIFACT is not MVP, complex export filters are not MVP. MVP export is expected to be full export of your data for discovery with simple filters (from round II) and export based on a prepared list of identifiers.
 - Exports marked MVP:

- Export holdings:

-  [UXPROD-1396](#) - Generating a simple MFHD from the Inventory holdings record
OPEN

- Export items:

-  [UXPROD-977](#) - Export Inventory Items to a designated output format
OPEN

- Export mapping profile:

-  [UXPROD-2453](#) - Metadata Export - Mapping Profile - instance, holdings and items to MARC Bib record
CLOSED

- Export job profile:

-  [UXPROD-2453](#) - Metadata Export - Mapping Profile - instance, holdings and items to MARC Bib record
CLOSED

- Data import

- More full featured import than what is available in Round II

- Action and mapping profiles

-  [UXPROD-2209](#) - Bring Action Profiles to life: next work
CLOSED

-  [UXPROD-2075](#) - MARC Bib Field Mapping Profiles Details for Inventory records
CLOSED

- Import inventory items

-  [UXPROD-185](#) - Import Orders in MARC format
DRAFT

- Import inventory holdings

-  [UXPROD-658](#) - Import Inventory Items from MARC Bibs:
 - Create
CLOSED

- Editing EDIFACT invoice mapping

-  [UXPROD-1381](#) - CRUD for EDIFACT Invoice Field Mapping
 - Profiles
OPEN

- Interactive data import/log summary

-  [UXPROD-2200](#) - Create interactive log-summary of batchload results, next steps
OPEN

- Single record import from OCLC

- Not calculated in MVP planning but we believe outside contract will lead to completion in same timeline as MVP*
- <https://issues.folio.org/browse/UXPROD-2080>

- Source record storage improvements

- Connecting MARC holdings to inventory
 -  **UXPROD-1575** - Make Inventory Holdings rely on MARC Holdings (Part 1 of Connect MARCcat, SRS, and Inventory for MARC Holdings) **OPEN**

Acquisitions Requirements

- Load orders and invoices from EDI and MARC
 -  **UXPROD-185** - Import Orders in MARC format **DRAFT**
 -  **UXPROD-195** - Import invoice in EDIFACT format (Folijet work) **OPEN**
- Voucher exports
- Facilitate transactions in multiple currencies
 - The ability to facilitate ordering and invoicing in currencies other than the default currency is MVP
 -  **UXPROD-697** - Ability to facilitate ordering and invoicing in currencies other than default currency **CLOSED**

Resource Access

- Remote storage integration module (CAIASoft)
 -  **UXPROD-498** - Remote Storage Integration Module (Caiasoft) **BLOCKED**
- Course reserves
- Automatically create overdue fees
 -  **UXPROD-109** - Charge automated overdue fines **CLOSED**
- Automatically aging to lost
 -  **UXPROD-87** - Loan: Aged to Lost using SET COST **IN PROGRESS**
- Create and manage patron blocks
 - Automated patron blocks (manual patron blocks appear to already exist)
 -  **UXPROD-82** - Automated Patron Blocks **CLOSED**
 -  **UXPROD-390** - CRUD Patron Blocks Limits and Conditions Tables **CLOSED**
- Recording check-in history and item statuses
 -  **UXPROD-2184** - View last check in on item record **CLOSED**
 - View status history on an item appears to be complete, more general circulation log development is not MVP
 -  **UXPROD-283** - View status history on item record (Q4 2019 work) **CLOSED**
- Z29.50 Support
 -  **UXPROD-560** - Z39.50 support MVP **DRAFT**

Non-MVP Features expected to be developed in 2020

Acquisitions

- Ability to manage donor information within FOLIO
 - <https://issues.folio.org/browse/UXPROD-1018>

Technical debt expected to be resolved in 2020

- Prevent conflicts via optimistic locking
 -  **UXPROD-1752** - Prevent update conflicts via optimistic locking **DRAFT**
- Support for upgrading schemas without complete reload of data (upgrade in place)
 -  **UXPROD-2120** - support for upgrading schemas without complete reload of data (DB migrations) - rollout + devops **IN PROGRESS**
