Acceptance Scenarios / Test Cases

Scenario 1: View/download a file from a document attachment

	Test Path Name	GIVEN Initial Context	WHEN Something Happens	THEN Expected Result	TEST SCRIPT Sequence of steps to follow	TEST DATA	ACTUAL RESULTS	Tester Comments	STATUS Pass Fail	LOG NOTE Tester / Timestamp
1	Successfully view/download a file from a document attachment in view mode	<ul style="list-style-type: none"> • as a logged-in user • with the minimum user rights ERM: can view agreements/licenses 	<ul style="list-style-type: none"> • opening the Licenses or Agreements app • searching for an instance • view instance contents • when presented with a view/download link/button • I click the link/button 	<ul style="list-style-type: none"> • (depending on browser setup) • a file is downloaded from FOLIO and loaded in the designated viewer or offered to be saved to local file system 	<ol style="list-style-type: none"> 1. Log in as user with minimum user rights ERM: can view agreements/licenses 2. Navigate to Agreements app/agreement with file attachment 3. click 'view/download' link/button in accordion 4. verify that file is accessible for view/save 5. Repeat step 2-4 for <ol style="list-style-type: none"> a. licenses b. supplementary material to license 	<ul style="list-style-type: none"> • (prepare agreement and license instances with file attachments) • (prepare test users with staged privileges) 				

2	insufficient user privileges	<ul style="list-style-type: none"> as a logged-in user without minimum user rights ERM: can view agreements/licenses 	<ul style="list-style-type: none"> opening the Licenses or Agreements app 	<p>request to use app is rejected</p> <p>(or if searching /browsing /expanding accordions are allowed: view/download button is inactive)</p>	<ol style="list-style-type: none"> Log in as user <u>without</u> minimum user rights ERM: can view agreements/licenses Navigate to agreement with file attachment click 'view/download' button verify that file is <u>not</u> accessible Repeat step 2-4 for <ol style="list-style-type: none"> licenses supplementary material to license 					
3	Successfully view/download a file from a document attachment in edit mode	<ul style="list-style-type: none"> as a logged-in user with the minimum user rights ERM: can <u>view/edit</u> agreements/licenses 	<ul style="list-style-type: none"> opening the Licenses or Agreements app searching for an instance edit instance contents when presented with a view/download link/button I click the link/button 	<ul style="list-style-type: none"> (depending on browser setup) a file is downloaded from FOLIO and loaded in the designated viewer or offered to be saved to local file system 	<ol style="list-style-type: none"> Log in as user with minimum user rights ERM: can view/edit agreements/licenses Navigate to agreement with file attachment /enter edit mode click 'view/download' button verify that file is accessible for view/save Repeat step 2-4 for <ol style="list-style-type: none"> licenses supplementary material to license 					
4	(Admittedly far-fetched) File access on FOLIO not successful (e.g. attachment has been removed/cannot be accessed on file system level)	<ul style="list-style-type: none"> as a logged-in user with the minimum user rights ERM: can <u>view</u> agreements/licenses 	<ul style="list-style-type: none"> opening the Licenses or Agreements app searching for an instance when presented with a view/download button/link I click the button/link the file cannot be accessed in the backend 	Possible feedback <ul style="list-style-type: none"> dedicated error message View/download button is turned inactive is removed 	Test-scenario: Two users are accessing the app simultaneously, user one removes attachment, which user two wants to access later in the same session see above
