

# MM - Missing MARC21 Fields Report

## Report Description Detail

To extract MARC SRS records where one or more MARC21 fields are missing from those records. For those consortium on a single tenant, it is also necessary to include the name of the institution as one of the fields. This report can be run ad hoc or on a regular basis.

The model is based on [REP-248](#) and [UXPROD-2215](#).

In Aleph, this is done by going to a particular reporting table where all the MARC records can be found called FCL01.Z00R (there is a table for bibliographic records and a separate one for holdings records). We select all from that table where the Z00R\_TEXT is NOT LIKE '035%' or insert the MARC 21 tab in the single quotes. In the example below, we want to know which records don't have an 035 field.

### Start report with:

MARC SRS storage

### Filters:

Missing MARC21 field

### Data fields:

MARC SRS UUID | MARC SRS Title | Holdings Location and Institution associated with that location Associated with MARC SRS Record

Folio Attribute (Module/Path:Object)	Folio Data Element Description	Parameters/Query
MARC SRS ID (mod-source-record-storage /source-storage/records/{id})	UUID for an MARC SRS record	Display in report
MARC SRS Title (mod-source-record-storage /parsedRecord/'245')	From parsed record in JSON, retrieves the MARC21 245 field	Display in report
MARC SRS No 035 field (mods-source-record-storage/parsedRecord/'035')	From parsed record in JSON	Do not display Filter to retrieve all MARC SRS records that are missing, i.e. don't have, the 035 field in the parsed record.
Location (mod-inventory-storage/location /name)	The name of the shelf location	Display in report
Library ID (mod-inventory-storage/location /libraryId)	UUID of the Library	Do not display
Campus ID (mod-inventory-storage/location /campusId)	UUID of the campus	Display in report
Campus Name (mod-inventory-storage /location-units/campuses/name)	Name of Campus	Display in report
Institution ID (mod-inventory-storage/location /institutionId)	UUID of the institution	Display in report
Institution Name (mod-inventory-storage /location-units/institutions/name)	Name of Institution	Display in report
