

FOLIO Reporting Reference Environment

A hosted reporting database is currently available for the FOLIO community. It provides access to data from the FOLIO reference environment `folio-snapshot` and is updated hourly.

To access the database using a client-side reporting tool such as [DBeaver](#):

- Host: `glintcore.net`
- Port: `5432`
- Database name: `folio_snapshot`
- User name and password: (contact Nassib Nassar)
- SSL mode: `require`
- JDBC Connection URL (if needed): `jdbc:postgresql://glintcore.net:5432/folio_snapshot`

For more information about using the database: https://github.com/folio-org/ldp/blob/master/doc/User_Guide.md
