2020-09-29 Meeting notes

Date
29 Sep 2020

Attendees
Paula Sullenger
Kelly Drake
@rscheier
Tod Olson
Emma Boettcher
Steven Bischof
Anne L. Highsmith
Anya Arnold
Charlotte Whitt
Chulin Meng
Debra Howell
Christie Thomas
Dwayne Swigert
Ian Walls
Jacquie Samples
Jean M. Pajerek
Kirstin Kemner-Heek
Marie Widigson
Mark Arnold
Martina Tumulla
Molly Driscoll
Natascha Owens
Patty Wanninger
Peter Murray
Thomas C. Wilson
Tiewei Liu
Tracy L Patton
Brooks Travis
Elizabeth German

Goals
## Discussion items

<table>
<thead>
<tr>
<th>Time</th>
<th>Item</th>
<th>Who</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ranking</td>
<td>Definitions</td>
<td></td>
<td>Where to put them?</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Reporting SIG has already made a copy, so this does need to get figured out soon.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Decision: In the interest of time, we’ll address this in the Slack channel.</td>
</tr>
<tr>
<td>Item status</td>
<td>Emma Boettcher</td>
<td></td>
<td>trying to work out a plan for if the custom item status feature doesn’t make it into the development plan before implementers go live with FOLIO. Would like to discuss what item statuses should be prioritized for development.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Slides: Item Status</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Custom item statuses are desired, but would crowd out must-have features in Iris. Would like to propose an additional set of built-in statuses, get feedback from this group.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Other item status features, including manually changing item status from item record, enhancements to In Process, creating process statuses customizing built-in item statuses (including deactivating them) and creating custom item statuses.</td>
</tr>
</tbody>
</table>
|                 |                    |                          | New feature for the item statuses to be prioritized:  
                                                                                                                                    |
|                 |                    |                          | ![UXPROD-2699](https://example.com/uxprod-2699) - Item statuses: Unavailable, Unknown Intellectual, In process - non requestable, Long missing, Restricted | ![UXPROD-47](https://example.com/uxprod-47) - Batch Importer (Bib/Acq) ANALYSIS COMPLETE |
| Batch loading   | All                |                          | Data Import - Draft Documentation                                                                                                                                                             |
|                 |                    |                          | This is an attempt at documenting the state of Data Import, including overlays. At the bottom is a list of related JIRA tickets.                                                           |
|                 |                    |                          | At Lehigh, have been able to do batches of 5,000 at a time. Cumbersome workflow. Breaks into batches of 5K, validates with MARCEdit, does dry-run load into a test system, then can do in production. Still sometimes hangs. |
| Topics for next week | Tentative: Marcia B and documentation | CPT and "workaround" issues from Sept 22 | The issues identified here need to be brought to attention of PC - what are priorities? NFRs for the base and put off features, or quick & dirty features to fix later? |
