OAI-PMH

Overall information

OAI-PMH UI module is a module for OAI-PMH settings management. OAI-PMH settings are divided into 3 sections: General, Technical and Behavior.

General:

Setting name	Description	Default	Required
Enable OAI service	Defines whether OAI-PMH module is accessible for the FOLIO repository. User can see message "To affect OAI-PMH features by settings please enable OAI service in the General section" on sections: General, Technical and Behavior when OAI service is disabled	true	
Repository name	The name of the FOLIO repository for harvesters.	FOLIO_OAI_Repository	Yes
Base URL	The URL of the FOLIO repository.	http://folio.org/oai	Yes
Time granularity	The finest harvesting granularity supported by the FOLIO repository.	YYYY-MM-DDThh:mm:ssZ	Yes
Administrator email(s)	The e-mail address(es) of the FOLIO repository administrator. In case of several e-mails, they should be separated by comma, spaces before/after comma are allowed.	oai-pmh@folio.org	Yes

Technical

Setting name	Description	Default	Required
Max records per response	The maximum number of records returned in the ListRecords response, should be whole number greater than zero.	100	Yes
Enable validation	Defines if the response content should be validated against xsd schemas.	false	
Formatted output	Defines if the marshalled XML data is formatted with line feeds and indentation.	false	

Behavior

Setting name	Description	Default	Required
Deleted records support	The manner in which the repository supports the notion of deleted records.	No	Yes
Suppressed records processing	Defines if suppressed records should be skipped or added into OAI response with discovery flag value.	Skip suppressed from discovery records	Yes
OAI-PMH errors processing	Defines which HTTP statuses should OAI-level errors be associated with.	Associate with HTTP status 200	Yes

Permission

To work with OAI-PMH module your user must have related permission: "Settings (OAI-PMH): Display list of settings pages" and/or "Settings (OAI-PMH): Can view and edit settings".

- "Settings (OAI-PMH): Display list of settings pages" - user can view all oai-pmh settings, but "Save" button is disabled. User can see the message "You lack necessary permissions to edit OAI-PMH settings. Please, contact the system administrator."
- "Settings (OAI-PMH): Can view and edit settings" - user can view all oai-pmh settings and "Save" button is enabled if field is modified.
