UI Testing Team

We were officially formed 18 July, 2018.

The role of the UI Testing Team is to:

1. Set general technical direction in anything that can affect quality of FOLIO UI applications.
2. Select tools to be used for UI unit and integration testing.
3. Develop UI Testing Guide
4. Advise teams on the best UI testing practices
5. Suggest DevOps and CI improvements to increase developer’s efficiency.

Members are:

- Anton Emelianov - EBSCO
- John Coburn - EBSCO
- Ryan Berger - EBSCO
- Zak_Burke - OLE and Cornell University
- John Malconian - Index Data
- Mike Taylor - Index Data
- Maxim Didenko - EPAM
- Dmitriy Litvinenko - EPAM
- Bohdan Suprun - EPAM
- Viktor Soroka - EPAM
- Mikita Siadykh - EPAM
- Maksym Dryha - EPAM
- Aliaksei Chumakou - EPAM
- Ivan Kryzhanovskyi - EPAM

Additional Members of #uitestingteam Slack channel:

- Mike Gorrell - Index Data
- Jakub Skoczen - Index Data
- Mark Veksler - EBSCO

About us

The UI Testing Team will provide technical guidance for implementation of UI tests to the development community. It will also contribute to all the facets of the DevOps process to enable UI testing. The end goal of this team is to develop common approach in delivering well tested, reliable and bug free UI applications contributed to FOLIO solution.

Communication Channels

- Slack Channel
- Wiki space (this page)
- UI Testing Team folder on Google Drive

See FOLIO Communication Spaces for more details about the project’s communication channels.

Meetings

Meetings are held every Tuesday at 10 AM Eastern U.S. time (following daylight saving time rules for that timezone; see this time in your timezone).
